Colorado No2: Check My Work

The Right Rite. Education first.

Open this in **Chrome** on your Android phone: **https://launch26000-xi.github.io/calculator-app/**

Test it. Check each box when it works.

1. ☐ The first screen is **Foundation**. You see **Today's lesson** and **The Pyramid** of bricks, with A RULE in red on top and THE CONSTITUTION in navy at the bottom.
2. ☐ Tap any of the **10 lessons**. Each one has a date and a **Sources** list with real links.
3. ☐ Tap **More**, then **Law Watch**. Each law has a plain summary and an official link.
4. ☐ Tap **Library**. You see **25 questions**. Tap one. It says "No2's Library" and "This is information, not legal advice."
5. ☐ Tap **More**, then **Recommended Reading**. Each article credits Michael Boldin and the Tenth Amendment Center.
6. ☐ Tap **Trading Post**. You see a **map of Colorado** and the distance slider. There are no fake items.
7. ☐ Tap **More**, then **Newsletter**. It has the crate masthead, all sections, and a sign-off from you.
8. ☐ Tap **More**, then **Sponsors** ($50, $150, $300) and **Events and Ranges**. Nothing fake is listed.
9. ☐ After we finish the Firebase setup together: tap the **person** button at the top, then **Continue with Google**, and pick a nickname.
10. ☐ Tap the gear, then the red **Install No2** button, then **Install**. The crate icon goes on your home screen.

My test scores (out of 100)

Easy to use for everyone	**100** on every screen I tested.
Safe and well built	**100**. (The map screens show 96 here only because my test computer can't download map pictures.)
Speed	**87 to 95.** Fast on a phone.
Member safety rules	**83 of 83** break-in tests blocked, like faking a verified badge or skipping the gun-shop step.

Good to know: nothing on No2 is made up. Where there is no real data yet, it says "Be the first." Members show on the map only as fuzzy circles, never exact spots. No money moves through No2. No app store is used.
