What is Colorado No2?

A one-page guide. The Right Rite.

No2 is a free app for people in Colorado. It helps you learn your rights. It also lets members trade gear with each other. You do not need an app store. You open it in your web browser. Then you can put it on your home screen.

Open it here:

https://launch26000-xi.github.io/calculator-app/

The screens

Foundation	This is the first screen. It has ten short lessons. Each one lists where the facts came from.
Law Watch	This shows gun laws for Colorado and the whole country. Each law has a short summary and a link to the real law.
Library	Here are 25 questions with answers. Each answer links to an official source. It is facts, not legal advice.
Recommended Reading	These are good articles from the Tenth Amendment Center. We give them credit.
Trading Post	Members buy, sell and trade gear. There are 11 groups, like handguns, knives and bows. The map shows Colorado only. It shows a rough area, not a home. If no one has posted yet, it says "Be the first to post."
Messages	Members can send private notes to each other. Safety tips are on the same page.
Suggestion Box	Each month there is a contest called The Best Thing Worth Saying. Members send one short line. Each verified member gets one vote.
Sponsors	Local shops can help pay for No2. They can pay $50, $150 or $300 a month. We have no sponsors yet, so the list is empty.
Events and Ranges	This lists real public ranges in Colorado, with links to the state wildlife office. We do not list any events yet.
My Account	You will sign up with your Google account. Then you pick a nickname. Sign-up opens soon.
Settings	This shows you how to put No2 on your home screen.

Our rules

Nothing in No2 is made up. If a page has nothing real to show yet, it says so. No money moves through No2. We never show where you live.
