Colorado No2: Check My Work

The Right Rite. Stage 1 test sheet.

Open this address in **Chrome** on your Android phone:

https://launch26000-xi.github.io/calculator-app/

(It works after you do the 3 setup steps in the plan. Until then this address shows "404".)

Test it. Check each box when it works.

1. ☐ You see the **No2 crate logo**, "The Right Rite", and the **Trading Post** first.
2. ☐ Slide **How far will you go?** to **10 miles**. Fewer items show (4). Slide back to **Whole state**. All 22 show.
3. ☐ Tap **Knives** at the top of the list. Only knives show. Tap **All** to go back.
4. ☐ Tap any item. It says something like "about 12 miles away." It **never** shows an address.
5. ☐ Open the **Remington 870**. Type **$300**, tap **Send Offer**, then **Accept**. Tap **Lock It In** and the demo button. A ticket stamped **LOCKED** shows the item, price and time. Finish the steps and give stars.
6. ☐ Open the **Mossberg 500 youth** and tap the seller, **ElkCreekEd**. You see **Not Verified** and a red **Use Caution** label.
7. ☐ Tap **Library** at the bottom. Type **background check** and tap **Ask**. You see "No2's Library," a **Constitutional view** box, and "This is information, not legal advice."
8. ☐ Tap **Messages**, **Newsletter** and **Suggestion Box** at the bottom. Each one opens.
9. ☐ Tap the **gear** at the top right. Tap the red **Install No2** button, then **Install**. The crate icon lands on your home screen. Open it: **no browser bar**.
10. ☐ Turn on **airplane mode**. Open No2 from your home screen. It still works. Turn airplane mode off.

My test scores (out of 100)

Install check	**PASSED.** Chrome says No2 can be installed. It works offline and shows a friendly page when there is no signal.
Easy to use for everyone (Accessibility)	**100** on every screen I tested.
Speed	**97 to 99.** Very fast, even on a phone.
Safe and well built (Best practices)	**100.**

Good to know: the listings, members and replies are **samples** for testing. Real sign-ups, real messages and real members come in Stage 2. No money ever moves through No2. No app store is used anywhere.
